

**WICANDERS®**

Nature at your feet

**Cork**comfort

© Apcor

**Amazing Designs**  
with the comfort of cork

Cork is a natural material that comes from the bark of the cork oak tree, with unique and incomparable qualities that no ingenious human has yet managed to copy or improve. Its cell structure resembles a honeycomb, enabling it to act as a natural thermal and sound insulator and also providing shock absorbing properties.

These exclusive qualities of cork make it ideal to use in flooring, as it grants an exceptional comfort while also being a renewable and sustainable resource.

Over the years, Wicanders has developed floor and wall coverings with exclusive properties due to its innovative Corktech technology.

By using a unique engineered multilayer structure, which combines state of the art technology with the exclusive natural properties of cork, a higher standard in flooring was achieved, providing the perfect match between beauty, comfort and durability.

The uniqueness of **Corkcomfort** floors was achieved by integrating three cork layers with different purposes. The decorative visual is accomplished by combining various shapes of natural cork, in order to produce thin sheets of veneer full of authenticity and personality. A second, thicker layer of cork provides superior comfort, noise reduction and warmth. The integrated cork underlay reinforces thermal and acoustic properties, resulting in a silent environment and important energy cost savings.

- Protective wear layer
- Genuine cork veneer
- Agglomerated cork  
Step sound reduction,  
warmth & comfort
- High density fiberboard
- Insulating cork underlay  
Impact sound reduction,  
& thermal reinforcement

# MORE THAN JUST A BEAUTIFUL FLOOR

## + SILENCE

Cork's natural properties make it an excellent sound absorber. **Corkcomfort** floors reduce noise transmission between and within rooms, creating a quieter and peaceful environment.

## + NATURAL THERMAL INSULATION

The unique thermal insulation features of cork provide an optimal floor temperature all year round, assuring a more warm and comfortable ambiance with energy cost savings.

## + WALKING COMFORT

**Corkcomfort** floors are very comfortable to walk on due to cork's natural and inherent flexibility providing a unique comfort in movement. Even when walking barefoot, a sense of cosiness is felt.

## + BODY WELLNESS

Softer than wood and harder than carpets, the perfect mix to absorb heel strike impacts, relieving leg and back stress, but stable enough to help the foot impulse and decrease the walking fatigue.

## + IMPACT RESISTANCE

**Corkcomfort** floors have the ability to bounce back from hard impacts, which makes them very robust and increases the life span of the flooring.

## Warm & Comfortable

Feel a warm and pleasant touch under your barefoot

## Sustainable & Conscious

The true sustainable flooring

## Stylish & Cosy

A cosy living with the freshness of a modern decor

# Amazing Designs

with the comfort of cork

# The distinctive style of cork flooring

In modern interior design, the creation of spaces with style and personality starts with beautiful and expressive floors. Using and combining different shapes of natural Cork, our team of experts and trendsetters created a unique collection that opens a new approach in decoration, in harmony with nature and human emotions.

The style, charm and sophistication of these genuine natural designs, creates atmospheres full of authenticity and character.

### Floating solution

With the glueless Corkloc® installation system, simply put the planks together and securely click them into place. It is a very quick, safe and clean solution. Available with three different protective finishings: WPS and WRT for residential areas and HPS for commercial areas.

The floating solution is available in tiles of 605x445mm (23 13/16 x 17 1/2") or boards of 905x295mm (35 5/8x11 5/8") and in planks of 1220x140mm (48x5 1/2") and 1230x145mm (48 3/8x5 5/8").

# Get the best results with **Wicanders' accessories!**

## Underlays

### Increased comfort and insulation

To reinforce the already amazing insulation properties of cork flooring, Wicanders provides Acousticork, a cork underlay which lets you turn your home into an even cosier space.

Acousticork increases the walking comfort, and also reduces the noise and the heat dispersion. Overall, it makes rooms cosier and more peaceful, which are essential in making any house feel homey.

It is available in two options: agglomerated cork and agglomerated cork with a moisture barrier.

- **High durability and long term resilience**
- **Increases floor thermal insulation**
- **Natural and sustainable product**
- **Easy to handle and install**

## Skirtings

### The perfect match to make a pleasant interior

In order to help to create a more classy and harmonious interior, Wicanders provides skirting profiles to complement your floor. Create your ideal transition between the walls and the floor, whether by an exact match or contrasting colors.

There are skirting profiles available for the complete range of **Corkcomfort** products.

Contact your supplier for information on the available skirting references.

## Maintenance

### Optimal care for an everlasting beauty

To keep your floor spotless, Wicanders has available a set of auxiliary products. Each of these has a specific purpose and is designed to make the caring of your floor as easy as possible.

REGULAR MAINTENANCE

#### Wicanders Soft Cleaner

This mild detergent is appropriate for weekly or even daily cleaning. It can be used to remove dirt, stopping it from infiltrating in the joints and in the embossing of the product.

#### Wicanders Spray Cleaner

Designed for regular cleaning, this mild detergent has the advantage of being a spray, which makes it a quick and easy solution to apply directly on the floor. It is very effective in cleaning dirt or grease stains.

PERIODIC MAINTENANCE

#### Wicanders Power Polish

This product is used for periodic maintenance, giving added protection to the floor due to its strong cleaning power. It helps to keep the floor's appearance intact over the years and is especially important to use in high traffic areas.

#### Wicanders Power Strip

The Power Strip is used to clean persistent dirt and to remove old maintenance products, since the accumulation of too many coats of these products can make the floor have an unpleasant look.

# Why is Wicanders cork flooring the perfect choice?

## + SILENCE

Thanks to the acoustic insulation provided by cork, Wicanders floors can easily cut noise within and between rooms.

Comparing the walking sound between cork and laminate floors, tests confirm that cork floors have an exceptional result reducing the sound up to 53%.

Study run by Entwicklungsund Prüflabor Holztechnologie gmbH (EPH) in Germany according to IHD-W 431.

## + BODY WELLNESS

Wicanders floors are stable enough to avoid the leg and back stress that is generated by walking on too hard or too soft floors.

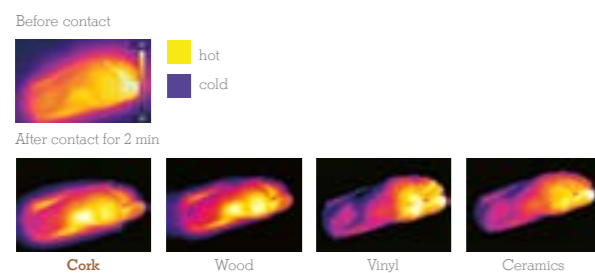

Softer than laminate and harder than carpets, Wicanders cork floors are the perfect mix to reduce heel strike impacts and related body tensions, but stable enough to help the foot impulse and provide the needed stability to reduce effort on walking and decrease body fatigue.

Study run by IBV biomechanical institute in Valencia, Spain.

## + NATURAL THERMAL INSULATION

Infrared foot temperature

The natural thermal properties of cork make Wicanders floors very energy efficient, providing an optimal temperature all year round.

When testing foot temperature in contact with four different materials, cork floors stand out as being the best solution to retain heat.

Better than wood and by far better than vinyl or ceramic when it comes to avoid energy dispersion.

Study run by IBV biomechanical institute in Valencia, Spain.

## + IMPACT RESISTANCE

Shock Absorbing

Due to cork's resilience and elasticity, Wicanders floors have the ability to bounce back from hard impacts.

Tests show that Wicanders cork floors have the highest shock absorbing performance.

When an object accidentally falls in a cork or in a laminate floor, different results come through.

Study run by IBV biomechanical institute in Valencia, Spain.

## + WALKING COMFORT

Cork floors are very comfortable to walk on, due to cork's natural and inherent flexibility, providing a unique comfort in movement.

When testing the level of comfort perception of people walking for 45 minutes over five different materials, results show that Wicanders cork floors have a great outcome.

With high comfort perception, it outperforms linoleum, laminate and ceramic floors.

Study run by IBV biomechanical institute in Valencia, Spain.

### Fast & Easy Installation

Floating floors are easy and fast to install. And in glue down floors there is no need to have a special subfloor preparation and only require the use of a unilateral glue, so they save time and reduce installation expenses.

### Low & Easy Maintenance

The special surface finishing of **Cork**comfort floors make them easier to clean and maintain.

### Sustainable

Cork comes from the bark of the cork oak tree. It is removed from the trunk by hand without ever damaging the tree. Every year a new bark grows making it a renewable and sustainable resource.

# Think green choose Wicanders®

Wicanders® is a truly sustainable brand! Produced by Amorim, it represents a unique balance between the creation of wealth and the protection of the environment. The starting point is a raw material that is extracted cyclically from the cork oak trees without ever damaging them. This raw material is then transformed into high value-added products while promoting the economic and social sustainability of areas at risk of desertification.

Several eco-efficiency studies, based on a comparative analysis with several other types of flooring, illustrate the excellent environmental performance of Wicanders® products and its manufacturing process. Besides the smaller amounts of energy and raw materials required for the manufacturing process, these products actively contribute to reducing global warming, not only through their low emissions, but also due to cork's natural property of retaining CO<sub>2</sub>.

It is estimated that the Portuguese cork oak forest – montado – is responsible for retaining 5% of the country's annual CO<sub>2</sub> emission, representing 4.8 million tons per year.

## The importance of Cork Oak

The Cork Oak (*Quercus Suber L.*) is a tree belonging to the Oak family from which Cork is extracted. Its value is based not only on the products extracted from the tree, but on all of the agricultural, forest, pastoral and hunting activities that revolve around the cultivation of the Cork Oak.

Regular extraction of the Cork (a process called stripping) is a fundamental contribution for environmental, economic and social sustainability in the rural areas of the Mediterranean region where the Cork Oak may be found.

The Cork tree is a slow growing tree, which may live for 200 years, which allows it, on average, to be stripped 16 times during its lifetime. The first extraction of cork from the Cork Oak tree occurs only 25 years after planting, following which it is harvested in 9 year cycles, without ever damaging the tree in any way. This method allows the cork oak forest to fulfill its role of fixing CO<sub>2</sub>, thus actively contributing to reduce global warming.

The Cork forest in Portugal (700.000 hectares), known as "Montado", is a typical Iberian Landscape which is key in supporting a natural bio-diversity, including some of the most endangered species in the world: Iberian Lynxes, Imperial Eagles, Black Storks, Wolves and Wild Bears.

## Inspire purity

Having in mind health and environment concerns, Wicanders has developed a Phthalate Free solution for the HPS finishing. Phthalates are substances usually included in plasticizers, which with time can become harmful. By replacing them in the HPS finishing, Wicanders presents a greener and healthier solution that grants improved indoor air quality, while also maintaining the flexibility, transparency and durability of a high performance finish.

Greenguard Certification helps the identification of interior products and materials that have low chemical emissions, improving the quality of the air in which the products are used. It promotes global sustainability, environmental health, and safety.

(except for gluedown Sanded which achieved A)  
As of January 2012, France has adopted regulations that limit total VOC emissions of building products. Manufacturers, selling their products in France must obtain a classification ranging from A+ (very low emissions) to C (high emissions). The declared goal is to improve indoor air quality in private/commercial buildings.

Global GreenTagCert™ is an independent certification and rating scheme for green products, recognized by the Green Building Councils of Australia and New Zealand. This certification also allows the products to be listed in the Ecospecifier Global eco-products.

(except for gluedown Sanded and PU Pre-Finished)  
An Environmental Product Declaration is a verified document that reports environmental data of products based on life cycle assessment and other relevant information in accordance with the international standard ISO 14025.

The goal of the German Cork Association is to assure the quality of cork products, as well as the optimization of manufacturing processes and the support of research projects.

(only for gluedown solution)  
Eco Mark is a Japan Environment Association program that promotes environment-friendly lifestyles through wise product choices. This certification analyzes criteria for every product category taking into consideration the environment life stage.

# A GIFT FROM NATURE

# Wicanders' solutions for a perfect floor!

## FINISHINGS

**HPS surface finish** (High Performance Surface) has been specially developed for areas with heavy traffic, such as commercial, business or general public areas. This high performance surface has an extra hard wearing surface combined with Nano-Beads Technology, where extremely tiny beads are embedded in a top layer for improved properties such as scratch, slip, scuff and stain resistance.

**Xtreme WRT surface finish** (Wear Resistance Technology) is the right choice to fit the most demanding needs of domestic areas. This environmental friendly varnish is based on a ceramic compound which ensures exceptional strength and longevity.

**WPS protective finishing** (Wear Protect Surface) was developed with an excellent resistance for the most demanding domestic areas. This varnish has an improved long life span and a soft touch.

For domestic areas that need a natural look and a soft touch, **PU** is the right solution. It is available as a pre-finished, to be completed on site, and a ready to use solution (PU Finished).

For those seeking for a customized solution, the **Sanded** option is what you are looking for. The surface is prepared to be finished on site, so you can select the finish that best suits your needs.

Try our easy floors and enjoy your home!

## INSTALLATION SYSTEMS

### CORKLOC®

#### CORK LOC® 2G

Välinge's 2G locking system is one of the most used and appreciated systems in the world. It is a strong and robust mechanical, glue-free, locking system installed by angling of both long and short side.

#### CORK LOC® FOLD DOWN

The Cork Loc Fold Down system, designed to simplify the installation by a "single-action-movement", is fast and easy to install. One single maneuver and the floor board is installed. This innovative system is available for narrow planks in 1220x140mm.

#### CORK LOC® 5G-C

The 5G-C locking technology is the most advanced type of Fold Down system on the market. It is a single action installation system with angling on the long side and a flexible tongue to fold the short side. The installation with Corkloc 5G-C locking system is faster and easier than conventional locking systems, and it really clicks, giving you a confirming sound. It is available for tiles in 605x445mm.

(d) Must be varnished on-site with minimum 1-2 coats of W-2000 or another recommended varnish for this level of use (see recommendation table in the packaging). (e) Must be varnished on-site with minimum 3 coats of W-2000 or another recommended varnish. (f) Must be varnished on-site with minimum 3-4 coats of W-2000 or another recommended varnish for this level of use (see recommendation table in the packaging). (g) Slab with Corkcomfort Floating WRT, reduces in 3dB the step sound when compared with the reference slab.

Produced by Amorim, the worldwide market leader in cork products, Wicanders matches nature's most pure values with avant-garde technologies to provide high quality, ecologic and stylish flooring. Wicanders has an unsurpassed reputation for developing high

standard and unique comfortable flooring solutions, following the latest decoration tendencies and targeting both residential and commercial market segments.

Wicanders is truly a sustainable brand!
