Nature walks with you

### **Excellence in flooring**

Amorim Revestimentos, the worldwide market leader of cork flooring, places nature on the starting point for a better future, investigating and creating flooring solutions that, without affecting the environment, ensure a higher quality of life.

Being present in more than 51 countries, Amorim Revestimentos' International flooring portfolio and brands, are known throughout the world as pioneers in creating top-quality, ground-breaking solutions.

Wicanders®, Amorim Revestimentos' premium brand, has been producing flooring since 1868, always inspired on nature's most pure values and using avant-garde technologies to provide high quality, ecologic and stylish flooring.

Wicanders® has an unsurpassed reputation for providing high standard and unique comfortable flooring solutions, following the latest decoration tendencies and targeting both residential and commercial market segments.

### **Parquet - Born from nature**

From luxuriant and exotic forests, nature offers one of the most precious materials to design, with which we have created a unique collection of wood floorings. Throughout each stage of the manufacturing process, from selection to finishing, Wicanders® creates the most advanced flooring solutions in harmony with nature.

In order to guarantee top-quality products, Wicanders® works with certified factories on various continents, adopting a sourcing strategy that turns possible the use of specific technologies, suited to the distinct characteristics of each individual wood species. This strategy enables us to offer unique products, while contributing to the economic development of problematic regions. This process is monitored by an Amorim committee of experts who ensure compliance with Wicanders® parameters.

# Creating an experience with Real Wood emotions

## INSPIRED BY NATURE

Mother Nature offers us perfection in the form of precious wood, which Wicanders® selects and transforms into exclusive flooring so that your everyday surroundings give you the calm and comfort of the purest emotions.

## ENVIRONMENTALLY RESPONSIBLE

Wicanders® philosophy is one of deep respect for nature, reason why only uses timber either from certified forests or at least from sustainable and legal forestry. Composed of 100% natural materials, the multi-layer construction allows to take full advantage of each species, using fewer resources than in solid wood floor production.

## ENDURING BEAUTY

Composed of three or multi-layer top quality technology structure, based on solid wood, Wicanders Parquet is very resistant and durable due to breakthrough manufacturing solutions that define this innovative concept. Its sturdiness is immediately felt, accentuating the charisma and comfort of your space for years to come.

## MULTIPLE CHOICES

Whether in new or renovated spaces, the Wicanders® Parquet collections offer you a wide range of woods, sizes and finishes customised to your style. Through high-tech finishing processes, these collections emphasize and enrich the natural texture of wood. From darker to lighter tones, from classic to more sophisticated textures, the Wicanders® collections guarantee a floor fitting your own style

## EASY TO INSTALL

The innovative WICLOC and Loc&Fold glueless locking system makes your installation easy and almost instantaneous. The majority of the items were designed for this floating type of use with no need for glues, unpleasant smells or complex assembly.

# Wicanders® Parquet

The wide range of Wicanders® Parquet floors follows the latest aesthetic trends and contemporary lifestyle needs.

Surfaces that reinforce natural textures and special colouring techniques are reinterpreted into different styles and expressions, which contribute to enrich the character and personality of any interior modern style, creating spaces full of positive emotions

Noble & Durable  
The remarkable enduring beauty

Natural & Conscious  
The true sustainable wood flooring

**Born from nature**  
to a contemporary lifestyle

# Think green, choose Wicanders!

The emissions of CO<sub>2</sub> are one of the reasons for the climate change. Wood absorbs CO<sub>2</sub> from the air and converts this harmful gas into carbon. 1 Kg of hardwood absorbs approximately the equivalent of 1,83Kg of CO<sub>2</sub>, meaning that 1m<sup>2</sup> of Wicanders® Parquet, with 20mm thickness, stores approximately 27,5Kg of CO<sub>2</sub>. This leads to a simple calculation: a typical living room of 35m<sup>2</sup> will, in average, neutralize the emission of a car during a one year driving.

Mature wood in the forest will start to rot sooner or later. During this natural process of decomposition the CO<sub>2</sub> will be released once again into the environment. To harvest the wood and to use it as timber flooring will continue to keep the CO<sub>2</sub> stored for many years. The positive contribution for a better environment is evident.

The mark of  
responsible forestry  
Only the products that are  
identified as such on this  
document are FSC certified.

## A commitment to nature's respect

FSC® (Forest Stewardship Council®) is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. The FSC forest certification system is an internationally recognized standard-setting which assures that the wood used in a product derives from an environmental appropriate, socially just, economical viable production process and in compliance with all applicable laws.

The FSC label provides a credible link between responsible production and consumption of forest products, enabling consumers and businesses to make purchasing decisions that benefit people and the environment as well as providing ongoing business value.

Look for FSC certified Wicanders® products in this brochure.

# Wicanders' solutions for a perfect floor!

## VISUAL STYLE

### 1-STRIP DESIGN

The special feature of the 1-strip design is the single strip of wood that emphasizes all the beauty and character of a real wood floor. The natural appearance of the wood, with knots and variations in the colour and grain, is truly reflected in this design. It is the perfect choice for large spaces.

### 3-STRIP DESIGN

The unique and fascinating 3-strip floor designs have a board surface composed by three strips wide. The strips are individually selected and combined in many different ways to create floors with different expressions, accentuating liveliness or calm.

### BEVELED EDGES - 2 SIDES

The 2 beveled edges in the long sides, accentuate the long plank appearance, creating an impressive sense of space.

### BEVELED EDGES - 4 SIDES

With the 4 sides beveled, the format of each board is emphasized, creating a more rustic and distinct look.

The surface  
is what you  
see and feel

Luxuriant floors  
Exquisite Elegance

2200 x 260 mm

Premium & Royal is the deluxe collection of Wicanders® Parquet floors. This outstanding collection sets the trend on the latest development in engineered flooring.

Available in wide boards with a maximum size of 2200x260mm and a 6mm top layer which will last for several decades, this advanced floor construction provides you top quality and nobility of solid woods allied with the sturdiness and stability of engineered floors.

Premium selection is made from 100% Oak layers and presented in a range of six unique products, with charming colours and distinctive surface features, such as brushing, smoking and hand scraping. These floors will enrich the luxurious character of any room.

Royal selection is made with a core multilayer of mixed Birch & Poplar plywood and presented in a range of three elegant visuals, ideal to create majestic vintage environments full of aristocratic charm.

The 2 side beveled edges feature of this collection reinforces the wider planks look, creating an even more expressive luxury floor.

Available with the traditional tongue and groove connection, it can be applied in floating, glue down or nail down installations.

Surprising effects and Unique looks

Boards with a maximum size of 1900x190x15mm

Up to 4 sides Beveled

WICLOC instalation system

Contemporary looks  
Distinctive ancient charm

The Kentucky collection brings the look and feel of antique floors reinterpreted into contemporary distinctive styles and expressions. Those visuals feature a combination of handcrafted aging, brushing, hand scraping and smoking techniques to provide floors that are truly unique. The natural character of the wood is enhanced with a wide colour range which spans from intense pales to deep black.

Available in boards with a maximum size of 1900x190x15mm and a 4mm top layer, it is produced with WICLOC glue less floating system. This easy installation method will save you time and costs.

#### **BIG CRACKS**

This finishing technique offers a distinct appearance, similar to the old worn look of floors found in old farmhouses, rustic estates and European castles. Each plank has a time-worn appearance with natural-looking hand-carved fissures, created by professional artisans hammering, chiseling and sculpting the hardwood.

#### **HANDSCRAPED**

Handscraped hardwood flooring is created by hand using wood scraping tools to give an old wood appearance. The detailed design placed into each plank brings out the wood's natural beauty creating a rustic, antique appeal along with old-world charm.

#### **BRUSHED & WHITE WASHED**

In brushed floors, soft portion of the wood is removed to expose the grain and bring enhanced definition to each plank, creating a refined yet weather-worn appearance. The style of the floor is also enhanced by a white washing process that involves painting hardwood with a thin and viscous white paint. This creates an antique appearance and allows seeing the original hardwood color underneath the finish. The final look is ideal for spaces with a classic country inspiration.

#### **SMOKED OAK**

Floor boards are smoked in special chambers. This gives them a rich deep brown colour, not just on the top surface, but right the way through the Oak top layer, so the colour will last a lifetime. Smoked hardwood floors give depth and an authentic allure to contemporary spaces.

Wood is a natural material. Variation in colour shade and texture is a natural and attractive characteristic. The colour in the photos may not be exactly the same as the original colours due to differences in printing.

# Bamboo

collection

Sustainability and design  
High-density structure  
Compatibility with underfloor heating systems  
Wicloc installation system

Exotic paradises  
Exciting Moments

With this collection of bamboo floorings, Wicanders® presents a revolutionary combination of sustainability and design.

Unlike wood, which takes about 50 to 60 years to mature, this plant from Asia is characterized for its fast growth (3-4 years), and no need for planting. The Bamboo Collection is also impressive for its extraordinary versatility and strength. With a high-performance three-layer composition, this Eastern-inspired flooring enhances the qualities of wood floors, with obvious added benefits, such as high-density structure, making it rigid and stable. Thanks to innovative cutting techniques, the consequent large diversity of patterns and combinations of textures, suggests an attractive range of possibilities for designing eye-catching home and commercial spaces.

All items are produced with WICLOC glueless floating system. This easy installation method will save you time and costs.

- 1 Top Layer 6 mm Oak
- 2 Solid Oak staves 11 mm
- 3 Balancing veneer Oak 3 mm

# INSTALLATION SYSTEMS

WICLOC is one of the most used and appreciated floating systems in the world. It is a strong and robust mechanical, glue-free, locking system installed by angling of both long and short side.

The Loc&Fold is a single action floating installation system with angling on the long side and a fold down system in the short side. With only one single maneuver, the floor board is installed.

The Tongue&Groove is a traditional method where a joint is made by fitting a tongue on the edge of a board into a matching groove on another board. It is the ideal option for a floating, glue down or nail down installation.
