Enabling wellbeing in every room

Rustic Forest Oak

WICANDERS®

Nature at your feet

Wicanders has a legacy that goes back to 1868 and is the global leading brand in flooring products with cork technology. Present in more than 70 countries, its promise is to provide Floors for Living, ready for real life, for our home and office, for our different rhythms, for our family and pets, for all those wonderful and simple, yet sometimes unexpected moments. Floors for our lives.

Over the years, Wicanders has developed sustainable floor and wall coverings with exclusive properties due to its innovative Corktech technology. By combining state of the art technology with the exclusive natural properties of cork, a higher standard in flooring is achieved. Available with cork, wood and stone looks, its products are able to provide a silent and thermally insulated environment, that endures impacts and is very comfortable to walk and stand on.

Wicanders means wellbeing, a choice for life!

FROM NATURE, TO YOUR SPECIAL SPACE.

Technology only makes sense if it improves people's lives. This concept finds expression in products developed with Corktech technology.

By using a unique engineered multilayer structure, which combines state of the art technology with the exclusive natural properties of cork, a higher standard in flooring is achieved, providing the perfect match between design and wellbeing.

Wicanders uniqueness is daily achieved by continuously research on how end customers think and live their spaces. Wicanders brings to the market products that provide a silent and thermally insulated environment, that endures through time and are sustainable at the same time.

Tradition

Keeping your comfort is our tradition.

Flooring is one of the most important structural decisions when decorating a space from scratch or remodeling one. The hue and style you choose for the floor of your space sets the tone for the ambiance to be built and it's always an extension of you and your style.

These 6 golden wood visuals are the Traditional approach that will go along with different types of furniture and will not overstep the overall decoration.

The bedroom is a space where you can have inner time and relax before each morning's rush. The comfort of your bed is crucial as is also the pleasant touch of walking barefoot on the floor - that's what Wicanders products can provide: beauty and thermal comfort.

Nordic

Innovation always finds original ways of expression.

Nordic-colour flooring visuals have the power to impact ambiances in a contemporary way. You may change the decor over time and the gentleness and lightness effect provided by the flooring will remain.

Whether it's a light or dark grey flooring in a minimalist and functional decor that characterizes the scandinavian style, these spaces can be highly personalized and welcoming.

Tradition

Turning dreams into reality.

Flooring has the ability to create or change the mood of every space. Depending on the style that you want to create throughout your home, you can choose between flooring looks that will totally impact the overall style or the ones that will turn the furniture set in a more low profile approach.

A living room is the social area of a home and it needs to be both a casual and a formal space that will act as a comfortable space to enjoy family time or to host a special event.

Flooring visuals with a Tradition look like these 8, offer the perfect complement to your furniture providing a sophisticated ambiance.

Finishing & Warranty

NPC surface finish (Natural Power Coat) is the last innovation in varnished cork floors being suitable for the most demanding domestic areas and commercial areas with moderate traffic, achieving a class of 32 (ISO 10874) and AC6 (EN 13329). Due to its chemical reaction during the hot coating process it is extremely wear resistant and highly flexible. This green coat also has a very pleasant haptic, which emphasizes the warmth and natural structure of cork.

(a) The following products were tested: disinfectant, C2H5OH, NH4OH, ditric acid, iodine, petroleum, spirit.

(b) Grade 0 - Unchanged / Grade 1 - Very little change / Grade 2 - Little change / Grade 3 - Change / Grade 4 - Strong Change.

(c) The following products were tested: acetone, coffee, NaOH, H2O2 at 3%, black shoe cream.

(d) Suitable for floor heating systems , according to German Federal Association Radiant Panel Heating.

Wicanders Flooring Collection is supported by a warranty.
Please, read the warranty terms on www.wicanders.com

WRT | PU

Greenguard Certification helps the identification of interior products and materials that have low chemical emissions, improving the quality of the air in which the products are used. It promotes global sustainability, environmental health, and safety.

WRT | PU | SANDED

TÜV-PROFICERT-product Interior brand is a voluntary, independent label for VOC-emission and quality of floorings. The results comply with the emission thresholds of AgBB, Belgian VOC regulation, Finnish M1 classification, BREEAM Exemplary Level, LEED v4 (outside North America), RAL-UZ 120 and Austrian Eco Label (Guideline UZ 56).

WRT | PU

As of January 2012, France has adopted regulations that limit total VOC emissions of building products. Manufacturers, selling their products in France must obtain a classification ranging from A+ (very low emissions) to C (high emissions). The declared goal is to improve indoor air quality in private/ commercial buildings.

WRT

An Environmental Product Declaration is a verified document that reports environmental data of products based on life cycle assessment and other relevant information in accordance with the international standard ISO 14025.

WRT | PU | SANDED

The goal of the German Cork Association is to assure the quality of cork products, as well as the optimization of manufacturing processes and the support of research projects.

WRT | PU | SANDED

The Blue Angel is a voluntary certification that guarantees that a product or service meets high standards when it comes to its environmental, health and performance characteristics. In the process, these products and services are always evaluated across their entire life cycle.

Global GreenTagCertTM is an independent certification and rating scheme for green products, recognized by the Green Building Councils of Australia and New Zealand. This certification also allows the products to be listed in the Ecospecifier Global eco-products.

Get the best results with Wicanders accessories

Underlays

Increased comfort and insulation

To reinforce the already amazing insulation properties of cork flooring, Wicanders provides Acousticork, a cork underlay which lets you turn your home into an even cosier space.

Acousticork reduces the walking sound and heat dispersion. Overall, it makes rooms cosier and more peaceful, which is essential in making any house feel like home.

For Hydrocork products, if you wish to use underlay, please consult Wicanders website or your supplier for more information.

- High durability and long term resilience
- Increases floor thermal insulation
- Natural and sustainable product
- Easy to handle and install

Maintenance

Optimal care for an everlasting beauty

To keep your floor spotless, Wicanders has available a set of auxiliary products. Each of these has a specific purpose and is designed to make the caring of your floor as easy as possible.

Regular Maintenance

Wicanders Soft Cleaner

This mild detergent is appropriate for weekly or even daily cleaning. It can be used to remove dirt, stopping it from infiltrating in the joints and in the regular embossing of the product.

Wicanders Spray Cleaner

Designed for regular cleaning, this mild detergent has the advantage of being a spray, which makes it a quick and easy solution to apply directly on the floor. It is very effective in cleaning dirt or grease stains.

Skirtings

The perfect match to make a pleasant interior

In order to help create a more classy and harmonious interior, Wicanders provides skirting profiles to complement your floor. Create your ideal transition between the walls and the floor, whether by an exact match or contrasting colours.

Contact your supplier for information on the available skirting references.

CREATED BY HUMANS, INSPIRED BY NATURE

Wicanders represents an unique balance between the creation of innovative products and the protection of the environment, combining state-of-the-art technology with the amazing natural properties of cork.

A green production process – Cork waste resulting from the industrial process is 100% reincorporated into the production, creating an ecologically virtuous cycle.

Intensive use of biomass – The cork powder resulting from the industrial process is burned in order to create biomass which is then used as a major source of energy to supply the production facilities, allowing Wicanders also to base its production in a sustainable source of energy.

Low carbon emission – Cork's natural property of retaining CO₂ combined with an eco-sustainable industrial process allows Wicanders to develop eco-efficient products with a low carbon emissions factor, positively contributing to a sustainable environment.

Indoor Air Quality – Refined to be free of harmful phthalates Wicanders products have been awarded with worldwide indoor air quality certifications such as Greenguard Gold or A+.

Negative Global Warming Potential – The majority of Wicanders products contribute to reduce global warming, since they retain more CO₂ than they emit.

CORK - A SUSTAINABLE RAW MATERIAL

Cork comes from the bark of the Cork Oak, a slowly growing tree from the Mediterranean basin that may live for 200 years and plays a central role in the social and economic development of this region.

Truly environmental-friendly - The extraction of cork and its related industries are remarkably sustainable, since the tree is never cut or damaged during the extraction process and the bark regenerates after each harvest.

Positive ecological impact - It is estimated that the Portuguese cork oak forest - montado - is responsible for retaining 5% of the country's annual CO₂ emission, representing 4.8 million tons per year.

An activity that crosses generations - Cork Oaks are manually harvested for the first time when the tree is 25 years old and then every 9 years making it an activity that passes from generation to generation.

A positive economic and social impact - Cork harvesting is a regular and cyclical process that contributes to environmental, economic and social sustainability of the rural areas in the Mediterranean region.

Rural areas economic engine - The cork activity as well as related activities fueled by this industry create jobs in many rural areas of the country, encouraging people to settle there.
