# Amorim Cork's stoppers have negative carbon footprints

Recent studies confirm that cork stoppers are a strong ally for wine producers, significantly reducing the overall carbon footprint of wine packaging

Conducted in accordance with the ISO 14067 standard and independently verified by APCER (Associação Portuguesa de Certificação), the studies showed that all products analysed (corresponding to 60% of Amorim Cork's portfolio) - ranging from natural and technical cork stoppers for still wines to Spark® Top II stoppers for sparkling wines - have a carbon footprint between -28.72 g CO<sub>2</sub>eq and -56.4 g CO<sub>2</sub>eq per stopper.

These findings highlight the important role cork stoppers can play in mitigating climate change and contributing to the decarbonisation of the wine sector.

#### Bee W® distinguished with the "Technology Innovation" award at ENOMAQ

Bee W® by Amorim Cork is an innovative bio-based beeswax coating for natural cork stoppers that further enhances their unique sealing properties

The biopolymers used in Bee W <sup>®</sup> reinforce the technical capabilities of natural cork stoppers, delivering low and consistent oxygen ingress rates, thereby improving the bottle-to-bottle consistency of wine flavours and aromas in ageworthy wines. Completely invisible to the human eye, this effective coating ensures sensory neutrality while maintaining the premium image of the wine.

3

#### We are ON! 2025 New Generation Forum

#### "Driven by Purpose"

In its third edition, this initiate brought together 150 young professionals to celebrate Corticeira Amorim's spirit, mission and values.

An event focused on alignment and empowerment that aims to:

- Emphasise the role of the younger generation as agents and catalysts of change and impact,
- Foster the expression of talent within teams and across the organisation,
- · Promote generational diversity,
- Encourage the motivation and retention of talented young people.

# Corticeira Amorim at the international conference "Cork FSC®: Natural Choice"

A conference aimed at underlining the importance of FSC® certification to ensure that cork comes from responsibly managed forests

The initiative, led by FSC ® Portugal in collaboration with FSC ® entities from Spain, France, Argentina, Chile and Brazil, brought together experts from different countries to highlight the ecological, economic and social value of cork oak forests, while promoting responsible forest management under FSC® certification.

Paulo Dias, Head of Corporate Banking, delivered a presentation on Sustainable Finance and ESG Operations, namely the first ESG financing line for cork suppliers in partnership with CGD.

# Poly-Monde 2025 industrial mission at Corticeira Amorim

Poly-Monde is an industrial mission designed to explore the global industrial context, highlighting the emergence of new markets, international competition, and globalisation

A total of 24 engineering students from Polytechnique Montréal (Canada), participated in the Poly-Monde 2025 edition in Portugal, Spain, and Morocco. Their journey through the cork oak forest and Corticeira Amorim's industrial facilities provided an in-depth look at the transformation of cork -from bark to high-performance applications in sectors such as construction, design and mobility.

### TUMO Portugal: Fostering Future Talent

Corticeira Amorim partners with TUMO Porto, promoting education, inclusion and youth development as drivers of innovation and progress

TUMO, a centre for creative technologies, develops key skills, helping young people gain an edge in a rapidly changing world. A free educational programme for young people aged 12 to 18, it combines self-directed learning with hands-on workshops led by specialists in areas such as programming, robotics, cinema, music, graphic design, photography, animation and game development.

7

#### SHIFT 2025: The Positive Turn Materials, Buildings and Cities For a Regenerative Future

Devised by Casa da Arquitectura, the first edition of SHIFT international seminar included a Ground Makers tour, which featured a visit to Amorim Cork Solutions

The Ground Makers tour provided an in-depth dive into companies working to reconfigure design and construction, paving the way for the transformation of cities. At Amorim Cork Solutions, architects, designers and students gained a closer look into how natural, renewable cork combines high performance with sustainable innovation to address today's most pressing architectural challenges.

SHIFT is a platform for inspiration, exchange, and action. Bringing together professionals, projects and communities, it encourages to rethink the materials we use, the spaces we design, and the cities we aspeire to shape for the future.

# Cork Collective boosts cork stopper recycling in New York

A recycling programme that aims to give new life to cork stoppers collected from hotels and restaurants

A joint initiative by Corticeira Amorim, Rockwell Group, BlueWell and Southern Glazer's Wine & Spirits launched in 2024, the programme mobilises their expertise to activate an initiative dedicated to endowing cork stoppers with a new lease of life.

Used corks from various places in Manhattan and Brooklyn, including some of the city's finest hotels and iconic restaurants are collected by dedicated electric vehicles. The stoppers are then processed and transformed into innovative, eco-friendly products that benefit communities and foster a greener future.

#### Casa Cork by David Rockwell at Milan Design Week 2025

An immersive installation created in collaboration with Cork Collective and Corticeira Amorim that spotlights the potential of cork in design, innovation and sustainability

A living lab showcasing cork's versatility, offering a multi-sensory and educational experience through cork-based furniture, hands-on workshops, live exhibitions and thought-provoking talks by key voices in architecture and circular design. At its centre, a monumental cork tree sculpted from recycled cork bark symbolises regeneration and nature's influence on contemporar design.

The programme also includes a Student Design Competition with finalists from Parsons School of Design and Politecnico di Milano.

### Consolidated Performance

## Key Figures

#### Sales decreased by 6.8% to 676.5 M€:

- Excluding the impact of the deconsolidation of Timberman, sales would have decreased by 3.6%,
- > FX negatively impacted sales by 3.9 M€;

#### Sales evolution by Business Unit:

Amorim Florestal -5.9%,
Amorim Cork -1.4%,
Amorim Cork Solutions -24.6%:

#### **EBITDA** margin of **17.4%** (9M24: 17.6%);

#### **EBITDA** totalled **117.6 M**€ (9M24: 127.6 M€);

- > **Negatives:** product mix, operating deleverage,
- Positives: price and quality of consumed cork, industrial efficiencies, operating costs;

#### Amorim Florestal + Amorim Cork: 82% of Sales

- > Sales: -1.6%
- > **EBITDA/Sales: 19.6%** (9M24: 21.7%)

# Key Figures

**Depreciation increased to 45.3M€** (9M24: 42.4 M€), mainly impacted by an extraordinary impairment loss of 2.0 M€ at Amorim Cork Solutions Transfer of industrial unit);

Non-recurrent losses of 0.4 M€ (9M24: 5.3 M€), mainly reflecting severance payments and equipment disassembly resulting from the transfer of Amorim Cork Solutions' industrial unit from Silves to Vendas Novas;

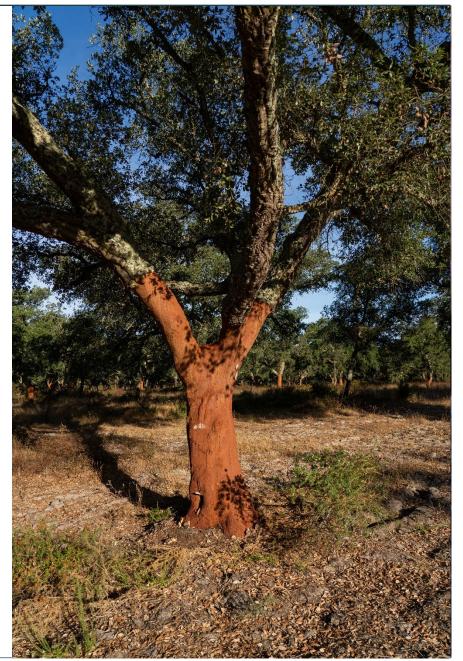

Net Income decreased to 45.7 M€ (9M24: 47.8 M€);

**Net Debt decreased to 99.2 M€** (YE24: 195.7 M€):

- Lower NWC needs (58.3 M€),
- > Dividends (42.6 M€),
- Capex (24.6 M€);

#### **Subsequent Events:**

Occurrence of a fire at Amorim Florestal's facilities at San Vicente de Alcántara (Spain) on October 19 caused property damages (buildings, equipment and raw material) and business interruption losses estimated at approximately €7 million; the company triggered its insurance policy, and the claim process is currently underway.

# **AMORIM**

### **Business Units**

#### CORTICEIRA AMORIM

AMORIM FLORESTAL AMORIM CORK

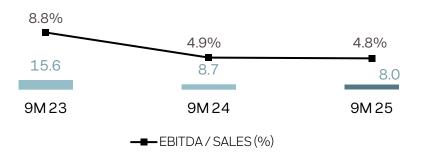

### Amorim Florestal

#### **Sales**

#### **EBITDA**

#### Sales decreased by 5.9% to 165.1 M€

Sales performance was affected by lower cork prices and subdued activity levels at other Business Units;

Although cork consumption prices were supportive, EBITDA margin remained stable, as these were offset by:

- > Unsupportive mix,
- > Lower volumes,
- Higher operating costs, particularly staff, transport and specialised works;

The Preparation and North Africa segments underperformed relative to expectations, with the former particularly affected by an adverse production mix and higher consumption prices;

The cork purchasing campaign was concluded, confirming a decrease in volumes due to lower demand; following a period of significant volatility, cork prices have returned to more normalised levels.

22

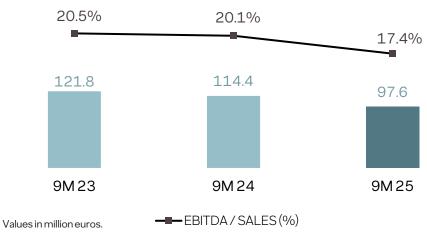

Values in million euros.

#### Amorim Cork

#### **Sales**

#### **EBITDA**

#### Sales decreased by 1.4% to 560.1 M€

Challenging market conditions continued to weigh on global alcohol consumption, particularly in the still wine segment;

Sales were adversely affected by an unfavorable product mix, despite resilience in volumes and selling prices;

Positive sales evolution of the spirits and sparkling wine segments, while the still wine segment remained under pressure, reflecting the contraction of the overall market and trading-down effects; strong growth of Xpür® stopper category, evidencing market share gains in the still wine segment;

Cork consumption prices contributed positively to the EBITDA margin; however, this benefit was more than offset by:

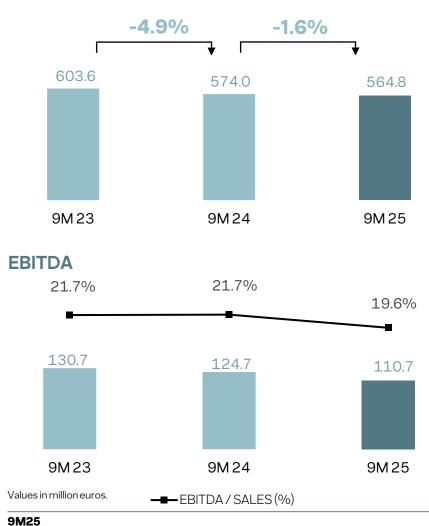

- > Deterioration in product mix,
- > Increased operating expenses, particularly staff costs;

Consolidation of Intercap added 7.8 M€ to the Business Unit's sales; unfavorable market conditions, contributing to a slower-than-anticipated progression of its turnaround process.

### Amorim Florestal + Amorim Cork

#### **Sales**

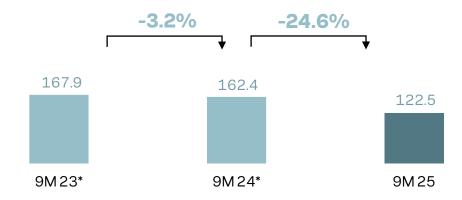

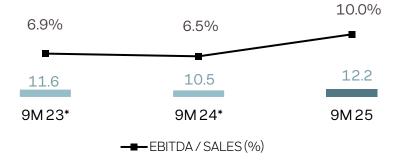

AMORIM

#### **Amorim Cork Solutions**

#### **Sales**

#### **EBITDA**

<sup>\*</sup>Pro-forma figures

Values in million euros

#### Sales decreased by 24.6% to 122.5 M€

Sales were negatively impacted by changes in the consolidation perimeter (disposal of Timberman in December 2024) – excluding this effect, sales would have decreased by 11.2%;

Organic sales performance was mainly driven by lower volumes, despite a slight increase in sales prices;

The Final Flooring, DIY and Insulation segments continued to show the largest declines; major sales increases in the Power Industry, Flooring Producers and Footwear segments;

Robust increase in EBITDA, despite lower volumes, driving margin expansion mainly through reduced operating costs (notably staff, marketing, transport, and maintenance); this improvement reflects the impact of measures implemented in recent months as part of the reorganisation process initiated last year;

The transferer of an industrial unit from Silves to Vendas Novas resulted in non-recurrent costs of 0.9 M€ and an extraordinary impairment loss of 2.0 M€ (recognised under depreciations).
